AWARD WINNING!

DIGI-SPEED 4 - Ultra Fast 1-Hour Charger

Microprocessor Controlled Ultra-Quick Charger

Microprocessor controlled ultra-quick charger for 1 to 4 AA or AAA batteries. Utilizes state of the art cooling technology that keeps the batteries cool, while quickly charging them at a very high mAh rate. Does either NiMH or NiCd batteries. **Includes 4 AA NiMH 2600 mAh batteries.**

- Individual supervision of each cell, allows for cells to be added or removed at any time
- Trickle charge technology allows for cells to be left in the charger, after charging, on call, indefinitely, with no loss of power, or damage to the batteries.
- Comes with plug-in DC car connector
- Charging times of under 1hr. to 1 ½ hours for empty cells ranging from 1500 mAh to 2200 mAh and higher. Quicker times if cells are partially full.
- Automatic detection of faulty batteries
- Each battery LED monitored and charged individually, switches to trickle charge when fully charged
- Faulty cell detection or if cells are inserted backwards
- 220v adapters available separately for world wide use, or use ANSMANN's universal plug-in power supply APS 1612 Traveller
- **Complete with 3 year warranty**

Cat. No. 5707033
