Award Winning!

Energy 8

A high-tech microprocessor controlled desktop charger for all your re-chargeable battery needs. The most advanced charging technology available today. Charging time is from 1 to 4 hours, depending on the requirement of the individual battery. Individual supervision of each battery provides maximum charging and long life of the battery. Individual LED indicators give you the status of each battery during the charging process. Does AA, AAA, C, D, and 9V batteries. Charges up to 8 NiMH or NiCd batteries at a time. Useable worldwide with 100-240V inputs. Detects faulty batteries. 3-Year Warranty. **Save time and money, while being more environmentally responsible! Have 6 AA batteries charged up, ready to go, at any given time, for all those in-store demo cameras. Re-chargeable batteries are good for up to 1000 times and last much longer in the camera then ordinary alkaline batteries**

- High-tech microprocessor controlled desktop charger for AA, AAA, C, D & 9V
- Individual LED indicators for each battery
- **3 Year Warranty**
- charges up to 8 NiCd or NiMh batteries at a time
- useable worldwide with 100-240V
