## ENERGY CHECK

State of the Art compact 'Energy Check' battery tester for N, AAA, AA, C, D and 9V NiMh, NiCd and Alkaline cells!!! It tests cells under the proper load and reads the capacity via LED's from 0 to 100%. Simply place the cell in the tester and squeeze the ends of the tester. No cords or contacts to connect!! Simple one hand operation!

Determining the status of your batteries before charging prolongs their life. Over-charging occurs when batteries are left in an old manual charger for too long, or are recharged in a common timer-controlled charger when only partially discharged.

- **3 Year Warranty**
- Compact, portable and easy to use.
- Tests NiCd/NiMH rechargeable batteries and Alkalines
- LED's indicate remaining power in increments of 25%
- Includes 9V battery power source.

Cat. No. 4000042

**Great add on sale item!!**
